THE WORLD OVER

WHEAT POWERS CAN'T AGREE

CHINESE AND JAPS FIGHT AGAIN

KIDNAPPING SOARS FOR ACTORS

WILEY POST SETS NEW RECORD

AIR ARMADA ENDS LONG TRIP

LONDON—An attempt was made to bring the tangled negotiations on a world agreement for raising the price of wheat on to the world conference stage, but it was duly rejected by the "big four" wheat-exporting nations who have been working on the problem outside the conference for many weeks.

The big four have already agreed—in principle—on limiting production and regulating exports in order to meet demand and consequently raise the price. But serious snags were revealed by their efforts to secure the cooperation of the exporting nations of the Danubian basin and Poland.

Once more the Chinese and Japanese are fighting in north China, and from day to day many reports of conflicts are received. At Shanghai last week a clash between General Peng Yu Hsiang's forces and Manchukuan guards on the western border resulted in the capture of Dolonier by Peng's troops. The city, which is just across the border from Jehol, is in Chahar province, was taken and the Manchukuan fled across the border.

The reported engagement is part of General Peng's campaign to regain Jehol and China's "lost provinces" of Manchuria which were seized by the Japanese and Manchukuan.

HOLLYWOOD—Steps toward the formation of a Hollywood "Scoutland Yard" were advanced as film celebrities, feeling a bit jittery as a result of the recent wave of kidnapping, depleted the ranks of unemployed bodyguards. Many stars of cinematicland during the past few days have employed private police for themselves or their children in fear that an effort will be made to abduct them. Others have had such protection regularly.

Recent kidnapping of John J. O'Connell, son of a powerful New York politician, brought to a new peak the demand for bodyguards made as a result of former detectives, many of them transferred from the Los Angeles police department, are finding new work. Joseph W. Reilly, chief of police of the Fox Film Corporation, is a member of a plan that the major studios combine in the organization of a filmland "Scoutland Yard." He has urged that ten of the larger studios raise a fund of \$100,000 so a far-reaching security system could be put into operation.

Trained investigators, having access to the so-called "underworld" would be employed.

Wiley Post, in his attempt to lower the time for a flight around the world has at least created a record, for he crossed the Atlantic on the first leg of the journey in 25 hours and 45 minutes, from New York to Berlin.

Bad weather held Post back for a few hours on his round the world flight.

There's one comfort about a cafeteria—if any one's finger is in the soup, it's your own.

DIVORCE UPHOLD IN MACKENZIE CASE

Action for annulment of the divorce brought by Mrs. Cora MacKenzie has failed, a written judgment by Mr. Justice Ford handed down last Wednesday stating that it was hard to determine the real truth of the case.

His lordship stated that he thought the interests of justice would be better served by proper provision being made for the support of the plaintiff and her right of access to her children, and the question of costs was reserved until he is informed whether or not an application will be made for an allowance for the plaintiff under the Domestic Relations Act. Should such an application be made, the judge intimated he was prepared to give as early an appointment as possible for the hearing. Hon. C. L. McPherson, minister of public works, Edmonton, was the defendant.

DISTRICT LAWN TENNIS JUNIOR TOURNAMENT

The District Championships held at Carbon on July 1st and 2nd proved such a success that the Carbon Lawn Tennis Club have decided to hold a District Junior Tournament on July 20th and 21st, at Carbon.

Four events will be sponsored, viz: Men's Junior Singles and Girls' Singles, Boys' Singles and Girls' Singles.

The definition of a Junior is one who was under 18 on January 1st of this year, and of a boy or girl, one who was under 18 on January 1st of this year.

Silver Cups, suitably engraved, will be given as first prizes in each event. The district is from Elberta in the north to Bassano in the south, and from Crossfield in the west to Hanna east, inclusive.

This is the first time that a Lawn Tennis District Tournament devoted entirely to Juniors has been held in this district, and a large entry is expected from the various towns, which include Elberta, Trochu, Three Hills, Strathmore, Strathcona, Okotoks, Bassano, Crossfield, Elberta, Crossfield, Olds, Didsbury, Standard, Rockyford, Drumheller, West Coulee, Hobbie, Swallow, Hussar, Cluny and Craig-miles.

Entries must be made to the Carbon Lawn Tennis Club Secretary, W. A. Brashler, by p.m. July 20th.

NEW RELIEF WORKS WONDERS FOR STOMACH SUFFERERS

Blama-Rez is a new antacid treatment that is bringing welcome relief to people who have suffered for years from the agonies of acid stomach. It acts four ways to give this relief: Neutralizes excess acid; relieves the stomach of gas; soothes the irritated membranes; and aids digestion of foods most likely to ferment. It is sold only at Rexall Drug Stores, and at McKibbin's Drug Store today and tomorrow.

Blama-Rez. Big package for 75c.

Another (treating little daughter for her first cold) "How do you like it, dear?"

Little Daughter: "It tastes just like your foot was asleep."

The hazardous flight in 47½ hours, flying time.

The flight heralds definitely the coming of regular trans-Atlantic air travel in the not far-distant future, declared the governor of Illinois.

LIBERAL CHIEF TO VISIT WEST DURING AUGUST

Rt. Hon. W. L. Mackenzie King will visit Calgary on August 12, according to an announcement received this week.

Arrangements for his entertainment are in the hands of a committee composed of members of the East and

Southeastern Alberta—Crops not severely damaged by drought are showing improvement. Wheat is heading on short straw. Pasture is fairly good. Western Alberta—in the north the wheat is heading at a good height and coarse grains are making progress. Moisture is ample. In the south prospects are less favorable and rain is badly needed. Sugar beets are satisfactory. Hay crops are below average.

Southern Alberta—Crops are poor in the western section and fair to good in the north and east. Where moisture has been received crops are making headway. Wheat is heading rapidly.

Southern Saskatchewan—Light crops are indicated, with little better than seed in some districts. Wheat is largely headed and straw short. Grasshopper damage is severe in many districts.

OLD TIMERS MAY REMEMBER ATTEMPT TO TAKE KING'S LIFE

HALIFAX—King George may owe his life to Nicholas Power, ex-chief of the Halifax police department, who celebrated his 50th birthday in June.

Back in the latter half of a century when "Nicky" Power was at the helm of the Halifax police force, two strangers arrived in Halifax and proceeded to take a deep interest in the "whisper anchored in the streets."

For several days after their arrival they hired boatmen with instructions to row around the men a'float and then, on the Halifax police force, two strangers arrived in Halifax and proceeded to take a deep interest in the "whisper anchored in the streets."

Power got wind of their activities and quietly began to trail the two men. A few days later, he took advantage of their absence to go through their baggage in the hotel room they occupied together.

The search climaxed startlingly in the discovery of 48 pounds of dynamite. A boyton floating suit and complete equipment for detonating the explosive from a distance.

Power immediately arrested the men. Under questioning they gave their names as Holmes and Brown. They had come to Halifax from the United States, they said, to blow up a new government building and other property of the British government.

The chief purpose, they revealed, had been to destroy one ship in particular, H.M.S. Canada, on which the present King George was serving as a midshipman. And had it not been for Sergeant Power's quick action in averting the plot, it is possible that the two dynamite would have accomplished that end.

Melvin Silver arrived on Monday from Calgary and is visiting with his uncle, Mr. Guttmann.

Miss Selena of Calgary, is visiting at the home of Mr. and Mrs. C.H. Nash.

Art Thomas returned on Monday from a couple of weeks holiday spent at Southern Alberta points. He was accompanied back by his nephew, Paul Irving, of Milk River, who will spend a couple of weeks here. Mrs. Thomas and children remained for an extended visit in Milk River.

A colored citizen had been unwell, exploring foreign chicken coops and heard that the sheriff was aiming in his direction. Hastily he sought the railroad station and asked the agent to get him a ticket to the end of the line on the fastest train.

Our fastest train left just ten minutes ago, replied the agent.

Well, guessed the would be tourist, just sinme de ticket and point out de way.

Lady Visitor—And what brought you here, my good man.

Convent—Well, madam, my father said when I was a boy that he hoped I would marry beauty and brains, and I wanted to please him, so I'm 'n' jolly busy.

BANK OF MONTREAL CROP REPORT—JULY 13

General—Crops in the Prairie Provinces, centering upon the critical period with moisture conditions unsatisfactory over a wide area. Rain on a generous scale is required to promote growth and fill. In certain southern and central areas drought damage has been extensive, and except in the northern portions of the province light yields are indicated.

Northeastern Alberta—Heavy showers have improved crops over large areas. Wheat is 75 per cent headed. Coarse grains are backward.

Southeastern Alberta—Crops not severely damaged by drought are showing improvement. Wheat is heading on short straw. Pasture is fairly good.

Western Alberta—in the north the wheat is heading at a good height and coarse grains are making progress. Moisture is ample. In the south prospects are less favorable and rain is badly needed.

Southern Alberta—Crops are poor in the western section and fair to good in the north and east. Where moisture has been received crops are making headway. Wheat is heading rapidly.

Southern Saskatchewan—Light crops are indicated, with little better than seed in some districts. Wheat is largely headed and straw short. Grasshopper damage is severe in many districts.

Old timers may remember an attempt to take King's life.

CARBON LAWN TENNIS CLUB FLIGHT TOURNAMENT

The Carbon Lawn Tennis Club has held a flight tournament, the first division of which is nearly completed. The conditions are that each player in the flight shall play 12 games with each other player, and when all games are played, the total win will indicate the standing of each player.

The following games have still to be played to complete the tournament: H. MacDonald vs. W. Dixon; C. Poxon vs. H. Jenson; C. Poxon vs. H. Brown.

The present standing is given below:

Name	Games Played	Wins
H. Jenson	15	10
H. Brown	15	8
W. Dixon	12	8
H. Poxon	12	7
H. MacDonald	12	6
V. Hawkins	12	5
H. Brown	12	5
C. Poxon	12	4
H. Jenson	12	3
A. Poxon	12	2

There is also a second Men's flight and a Ladies' flight in progress, but these are not nearly completed.

Southern News

Mr. and Mrs. Henry Hepper, from Walsh, Alberta, spent a few days visiting with relatives in the district the past couple of weeks. Mr. Hepper is a cousin to J.J. Berthel, U.J. Berthel, Sch. and to J.C. C. Porman.

Mr. and Mrs. G. K. Schell and Mr. and Mrs. Fred Schell returned home on Friday of last week from a trip to California and Washington.

Those who went to Leduc on Wednesday to attend the meeting of the Young Peoples Society at the First German Baptist church were: Mr. and Mrs. Chris. Hirsch, Mr. and Mrs. Chris. Diehl, Mr. and Mrs. Albert Berthel, a d. children, Miss Ella Berthel, Mr. and Mrs. Gottlieb Schell, and Albert Schell, and Mr. and Mrs. Adam Beyer.

Mr. and Mrs. Emanuel Berthel and children returned home on Sunday from a trip to Carleton Place and Hanna.

Mr. and Mrs. C. C. Porman and Mr. and Mrs. Ted Schmidt returned on Tuesday of last week from a trip to North and South Dakota.

Mr. and Mrs. J. F. Ohlhauser and children and Mr. and Mrs. Emil G. Ohlhauser left last Friday for a motor trip to Fox Valley, to visit with relatives for a couple of weeks.

Local News Items

Mrs. Jas. Castellone returned on Sunday evening from a visit in the City.

Alfred Brodner, of Beebe, Alberta, spent a couple of days last week at his home in Carbon.

Mr. and Mrs. John J. Forch and Mr. and Mrs. Porman have returned from a motor trip through the States and report most crops nearly everywhere on the way. Carbon district they say, is about as good a farming district as they saw anywhere on the long trip.

PLYMOUTH BINDER TWINE

A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gaining that fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and world purchasing power, memories of old crises hedge the inflation suggestions with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of uncontrolled inflation. They remember the disastrous sky-rocketing of commodity values in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations involving reckoning in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation to them means printing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they hesitate to venture into the realm of uncontrolled inflation.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of frenzied reckoning. Britain hazarded a return to gold, and bled herself white in the process of maintaining the standard. So much so that when the country eventually was forced off gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a heroic design to raise commodity price levels and revive moribund industry, has seen fit to release the dollar from gold, and is not to be persuaded to hitch it to any other monetary standard until experience has demonstrated the proper level at which it should be fixed for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London news would indicate that, whereas Britain abandoned the gold standard and apparently was allowing sterling to find its own level, in reality the pound, for some time, at least, has been maintained in a position of some relative stability with the French franc. Some measure of control, therefore, has been exercised in Britain and, in the result, there has been no appreciable disequilibrium between money wages and commodity values. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, this position having been reached, a strenuous effort will be made to prevent the inflationary trend from going far enough to negate the good done.

The controversy between the members of the Gold Bloc and those adhering to the Sterling-Dollar group had the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the test, Britain threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward these countries rather than to the continent of Europe for the trade opportunities essential to her economic wellbeing. London observers have made a shrewdly manifest that the British people are becoming more wedded to the idea of an Empire Economic unit, to the extent that such an idea is tenable. Indeed, at one crisis in affairs of the conference, when definite attempts were made to force its adjournment, many proposals of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious deduction to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British opinion is enthusiastic for practical application of the Ottawa agreements and for their extension. Canada should not hesitate to capitalize this favorable attitude; and, with prices of the primary products moving upwards, the stage is being set for a real revival.

Costs Little To Operate

Small Airplane Weighs Less Than Thousand Pounds.

One of the smallest airplanes built, a two-cylinder Aerona, is proving its wings in high altitude flying at the Western Airport at Denver, Colo. It weighs less than a mile above sea level. The plane weighs less than 1,000 pounds loaded, and can be operated for less than \$2 an hour. Its owners say it develops a maximum speed of ninety-five miles an hour and maintains a cruising speed of eighty miles per hour. It burns only two and a half gallons of gasoline an hour. The craft is a two-seater cabin monoplane.

Would Be Some Crew

No one in the farm district community of Shenandoah, Iowa, is unfamiliar with a rooster's crow at dawn, but at any time with a slight disquiet, many complain of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do to keep their children cool, they are liable to get sick from the heat, and most of the other 11,000,000 joined in with them. The din brought many started residents out of bed.

A Martyr To Science

Doctor Pierced His Body To Test Pain Sensations

How a doctor suffered self-inflicted pain by piercing himself to the bone with a sharp needle was revealed at the Johns Hopkins Institute for Clinical Research at St. Andrews, Scotland.

Next martyr to science, Dr. David Waterston, narrated to the Institute how he decided to make experiments on himself, as it was vitally essential to have training in the analysis of sensations.

His experiments were to discover what extent pain was felt when different parts of the body tissues were irritated from outside.

Dr. Waterston pierced himself with a sharp needle until he reached the bone. He made observations as he reached muscle, veins and arteries, to discover the extent of the pain he felt.

At one point, when he had penetrated an artery in his arm, the pain was so acute and sickening that he almost fainted. Undaunted, he continued his experiments.

Dr. Waterston's conclusions bring a new theory for the solution of a problem which has perplexed mankind since the world began.

Former theories stated that pain was due to over-stimulation of the nerves which existed for the purpose of sensing touch. Dr. Waterston stated that that is not the case.

These nerves do not reach to the surface of the skin. A needle can be passed through the epidermis and

Further insertion of the needle at one produces a feeling of pain.

The "Island Of Fright"

Noted For Thrilling Stories Of Shipwrecks and Rescues On Brittany Coast

A rocky ledge off the Brittany Coast where rock roads lead to villages with houses of stones was vividly pictured to a Montreal audience by Marie La France, noted French actress. She described the boat trip from Brest to the island and told of the landing place, a perpendicular ladder clutched in the solid rock. One shore she said, women wait for the boat, standing motionless like statues.

Many vertical rocks and many lighthouse mark the shoreline, and inland stretch monotonous miles of grassy rock which thousands of sheep graze. Blue windows frame the houses lead the sole relief to the gray of the rock and the green of the grass.

Originally the island was named the Island of Fright because of the continual overwhelming mists, she believed, also because of the sea, the impregnable rocks formed a safe hideaway for pirates. Tales of piracy belong to another day and the island is now noted for thrilling stories of shipwrecks and daring rescues by the Ubahut.

Somefolk with their wild, wind-torn hair she described as proud and upright. The menfolk are strong and simple men who visit many a French ship.

Many a French ship has already married a "Guesantine."

Great Authority On Crime

Sir Emley Blackwell Retires After Long Service As Adviser

Sir Emley Blackwell, prison reformer and police authority has retired from his position as legal assistant-under-secretary to the Home Secretary. He has now reached the age limit of 65 years.

It is said that no man in the United Kingdom is possessed of a greater insight into the mind of the criminal or has so extensive a knowledge of the methods of the criminal fraternity as Sir Emley Blackwell. His friend to the criminal trying to make good, but to the hardened criminal he makes his living by crime. He has proved a positive trend.

He has spent many anxious hours at the Home Secretary's side, has been a leading petitioner from convicted murderers and other criminals, for it was his duty to advise the Home Secretary on points arising on these matters. Every petition for many years past has gone through his hands. Born at St. Andrews in 1848, he was called to the Bar at the Inner Temple in 1882. He became assistant-under-secretary to the Home Office in 1913.

In the last two years 400 women have been appointed magistrates in London and in the provinces.

Many a bachelor gives up good quarters to get a better half.

Grain Elevators Busy

Rise in Wheat Prices Brings Changed Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time.

Robert Weir, Minister of Agriculture, stated on his return to Ottawa, that he has been for several weeks on a visit to his constituency of Melfort, Sask., and also visited much of the surrounding country.

The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 80 cents a bushel, and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said.

Some 50 municipalities had been badly stricken by the grasshopper plague, Mr. Weir said, and assistance could have to be given them.

Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

The Morning Post states Timber Distributors, Limited, a group of British importers, announced in a letter to British firms interested in purchasing timber that they would import 600,000 board feet of Russian lumber during the coming navigation season.

The newspaper said Timber Distributors, who have previous plans to import Russian wood were stopped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 10 shillings to the contract price for the lumber to cover inconvenience caused by the embargo.

Even with this addition, the Post guessed the firm as saying, the price in the British market would be far lower anything with which Canadian timber interests could compete.

Completes Cross-Canada Flight

Secretary Of Clubs Finds More Flying Being Done In Cities

George M. Rosa, secretary of the Canada Flying Club Association, landed at St. John's, Nfld., after a long flight, completing a flight across Canada during which he visited all the Atlantic provinces. He made the first leg from Calgary in eight hours, flying the Moth plane presented to Mayor-General J. H. Macbride, president of the aviation league, several years ago. It is the Moth's fourth visit to Vancouver and its fourteenth trans-Canada flight. It has done some 80,000 miles.

Mr. Rosa finds more flying is being done in nearly every city. "Fewer Canadians are going to the United States for their aviation training," he said. "In some parts of the east, in fact, the trend is the other way."

Railroad Station Nursery

Newest Innovation Established In France Will Be Free

A nursery is the latest innovation to be installed at the Montparnasse Railway Station in Paris which serves the district of the same name. Sixty babies may be cared for in this railroad nursery, the first to be established in France, which will shortly be initiated in the principal stations of the State Railways. If baby wants a bath, a change of clothing, a bottle of milk, or a nurse, all this will be available at the nursery, and all of it will be free.

It has been discovered that can be communicated by performing a kind of dance. Those with whom they communicate generally do the same.

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver

Many people who feel weak, tired and generally run down, make the mistake of taking a lot of medicine, and so make the trouble worse. The best way to get the liver working is to take a course of treatment with the Liver Tonic. It will give you a new lease on life. It will make you feel like a new man. It will make you feel like a new man. It will make you feel like a new man.

Cars Are Practically

Immune To Lightning

Safest Place For Motorists If Storm Overlooks Them

If you are driving along the highway when an electrical storm comes up, and you seek a safe place to stay until the storm passes, just take the advice of experts, and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer in his car during an electrical storm than in his home. Come to think about it, there are mighty few records on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out on electric storms, particularly in our larger cities.

Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 150 delegates, representing 22 countries, will assemble in London for the three-day centenary celebrations of the Entomological Society of London, England.

Scientific entomologists in every country of the Empire are now fellows of the society, and in proof of the value of their work two outstanding successes may be mentioned—the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire coconut industry of the Fiji Islands from a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasite insect. The world's hopes of controlling the migratory locust in Africa and Asia is also dependent on the economic entomologist.

Wonderful Trip For English Schoolboys

Have Left Manchester On Holiday Trip To Morocco

Twelve pupils at the Manchester grammar school, who have left for a holiday trip to Morocco, are the first English schoolboys to be permitted to visit the country of the Sultan and high officials.

In addition to exploring many little known parts of Morocco, the boys will also act as ambassadors for the Lancashire cotton trade. They are taking with them a number of samples of Lancashire cloth, in order to impress the people of Morocco with its quality. As a result of doing this on previous visits many of the Moroccan hotels have purchased large quantities of such Lancashire goods as tablecloths and bed sheets.

Boom In Construction

Twenty-six Cities Plan Building Projects Which Will Total \$160,000,000

Twenty-six cities in Canada expect shortly to undertake engineering and building projects amounting to \$160,000,000, according to a survey made by the national construction council, in all questionnaires were sent to 54 centres, and it is expected the final figures will reach \$350,000,000.

Local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and research work in the various provinces for the national body.

Best Container For Cream

A well soldered plain-bottomed tin can, about eight inches in diameter and with a capacity of about one quart, is the best kind of vessel in which to hold cream. It is easily cleaned and convenient to handle. If cream is held in earthenware crocks that have in any way become chipped, an unattractive flavor may be imparted to the butter.

Had New Experience

Canada's Governor-General has met with a new experience. He attended his first baby clinic. Doctors examined 25 lusty youngsters while Lord Lady Bessborough, looked on. The clinic was part of a program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

Germans Accept Nazi Salute

Polite Greeting Is Very Similar To Fascist Gesture

The Nazi or Fascist salute, with the right arm uplifted, is slowly but surely taking hold among the German masses.

While it has not yet replaced the handshake or hat-tipping as thoroughly as has the "Roman salute" in Fascist Italy, it is becoming more and more generally accepted as a polite form of greeting.

The Hitler salute, as at present practiced by non-Nazi civilians, still lacks the snap and sweep of the Mussolinian gesture.

The Italians shout the right hand, palm outward, well above the head, add it there for a brief dramatic second, then drop it sharply.

In Germany, however, most of the saluters are content to bring the right forearm up from the elbow to the level of the head and then lower it slowly.

Woman Wins Fellowship

Graduate Of Toronto University To Conduct Research In England

A Royal Society of Canada fellow to be held at Newham College and the Botany School, Cambridge, has been awarded to Dr. Dorothy F. Forward, a graduate in Arts of the University of Toronto, who holds also the post-graduate degree of M.A. and Ph.D. The work for which she was awarded this fellowship is concerned with the physiological resistance of wheat plants to attacks of rust. During her post-graduate studies in the department of botany she held a fellowship of the Ontario Research Foundation. Dr. Forward expects to proceed to England this summer.

Greatly Improved Prospects For The Western Canadian Wheat Grower Are Now In Evidence

A bear last year, a bull today, William Smith, wheat buyer for the Scottish Co-operative Society, presents a heartening prospect for the wheat growers of Western Canada.

He believes that prices will continue firm, and that there will be good demand for Canadian wheat this fall. While the export market is sluggish because of a speculative flurry in the United States and Canada which has sent North American prices out of line with the world price, the Liverpool price has been climbing steadily and there is a good potential demand.

Importers and millers have been following a hand-to-mouth policy; the quality of the Argentine crop is poor; little Australian wheat is available; all of which indicates a healthy demand for the new Canadian crop.

Nearly half the rise which has occurred in Canadian wheat prices is due to changing currency rates, the pound sterling being stronger in terms of Canadian dollars. But world crop conditions have also been a considerable factor in the bulge. If speculators have taken undue advantage of these basic factors and have pushed the price out of line, it is a demand, the margin is not so great but it will correct itself with comparative little loss.

Ultimately there is a real prospect that the Western Canadian wheat grower will be able to dispose of his grain somewhere around present, or better, levels. That means renewed buying power in Western Canada, better business throughout the Dominion.

The 1933 crop is being produced at the lowest costs ever achieved in this country. Eighty-cent wheat presents a fair margin profit on the year's operations for Western farmers. It means that they will be able to buy more clothes, machinery, building supplies, the thousand and one articles which are normally in demand, some of which the farmers have been going without for a year or two because they were compelled to make the old ones do.

Every dollar of new wealth that will be brought to the farmers of the West by profitable wheat prices will mean at least five dollars in distributed purchasing power. The consistent improvement in business activity in the prairie provinces which has been under way during the past two months will work its way rapidly through the whole of Canada as the crop begins to come on the market. The worst of the economic storm is over for the Dominion. The sun has begun to shine again. Business is picking up, and enterprise is sticking its head out of the storm cloud. — Winnipeg Tribune.

One Motive For Gift

Lindbergh Did Not Want Home Exploited As Show Place

It is entirely characteristic of Colonel and Mrs. Charles Lindbergh that they should turn over as an institute devoted to child welfare, their former home near Hopewell, New Jersey, the scene of so shocking a tragedy concerning a little child. We can conceive of nothing more fitting nor more filled with a tender and imaginative justice. But it is a horrible comment upon American life that one motive of the Lindberghs in deeding the property over to child-welfare work was to save it from various promoters who wished to buy the scene of the Lindbergh kidnapping for an exhibit. It is a shame that all the stories of crime, there have been few which have laid bare so many sordid motives as has this one. — New York Evening Post.

Singing Taught In Camp

In the belief that singing is of equal importance in camp life with athletics, officials of the Montreal Youth Men's Christian Association summer camp are concentrating on the gentle art of voice production this summer. Special attention is given the older songs, while the campers are made familiar with the conditions under which the songs were written and their historical background.

Holiday Toll Heavy

Lives of 14 men, women and children paid for the celebration in the United States of the 150th anniversary of the republic. Automobile accidents for 22 deaths, 46 persons drowned, six died as a result of firework, and 30 were killed from other accidental causes.

New Device Valuable

Photographic Appliance Is Of Great Service In Court Trials

Accurate details of scenes of accidents or crimes are claimed to be obtained from use of a new Swiss photographic appliance, according to a report from Consul General R. H. Hill at Zurich.

The process is an elaboration and extension of the system of mapping and mixing topographical surveys by terrestrial and aerial photography. The system provides a stereoscopic view of the objects from which the plot or diagram is automatically scaled. It is claimed that the results are accurate to within one-half inch in the usual street measurements.

The new device is designed early to simplify the procedure of accurately portraying the position, relation and dimensions of vehicles and other objects and highways.

By having the apparatus available at a few central stations it can be rushed to the scene and the photograph completed in a few minutes. The equipment is now in use in Zurich and is reported to be giving satisfaction.

It is claimed that necessary exposures may be made in five minutes, that frequent personal visits are eliminated and that permanent records may be made available.

Treadmill Dog Likes Job

Sets Record In Fatigue Experiment At Laboratory

Forty miles of running in six hours, with just one short halt for a drink of water, is a record set up by "Joe" a mongrel dog of large proportions, used in fatigue experiments at the Harvard University Business School Laboratory.

And the peculiar part is that "Joe" loves his job. His job is running on an electrically driven treadmill while scientists study his food consumption, blood circulation, temperature, etc.

The second Joe is released from his cage, he emits a loud "woof" and makes a dash for the treadmill and keeps right on barking until someone turns on the current. Joe can run for hours without getting tired.

The scientific tests are made to determine the organic changes resulting in the body from fatigue and to learn the extent to which fat and sugar substances are used up from exercise.

Ordinance maps of parts of England have just been found to be 40 years out of date.

MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

WHAT PAIRS DOES WITH CONTRAST FOR YOUTH AND YOUTHFUL TYPES

Plainsman silk in yellow and grey tone this plain grey crinkly crepe silk model.

Note the smart new skirt cut. It affects jumper styling.

And don't you like the youthful front closing body? It has been in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30 inches bust.

It is also lovely carried out in one colour as slate-blue crepe silk with white crepe collar.

Size 16 requires 2 1/2 yards 35-inch wide fabric. Size 28 requires 3 1/2 yards and 1 yard 39-inch for collar.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap one carefully.

Things Are Different Now

Hotel Managers In Old Days Could Be Independent

Charles L. Webber, retired proprietor of the Buckingham and Getham hotels in New York, is dead, aged 83. Recently Mr. Webber talked of the old Buckingham. "We got the cream of the trade in the old days," he said. "Those were the days you never got any more in the hotel business, when a manager could afford to be independent. If a guest asked for an extra wardrobe in his room we seldom let him have it. On Nov. 1 we always had a long list of people waiting for suits. When I first came to the Buckingham John D. Rockefeller was stopping here with his family. He stayed with us for several years. There was very little steam in the house, and the rooms were always heated by open fireplaces. This made a great appeal to the English trade. The building wasn't fireproof and we used to maintain an elaborate fire drill with practice once a week." — New York Times.

Barred Debates On Railroads

Speedy Travel Was Considered Rank Infidelity In 1878

While arguments on birth control, one piece bating suit and redistribution of wealth held the limelight today, way back in 1878 debates on "modern" trends were being waged. Joshua Smith Franklin, display a letter in reply to some modern spirit of that date who asked for a school hall for the purpose of debating some question. "You are welcome to the use of the school to debate on proper questions," the letter says, "but such as railroads are impossibilities and rank infidelity." Further on the writer adds "If God had desired His creatures to travel at the frightful rate of 15 miles an hour He would have foretold it through His holy prophets. It is a device of Satan to lead immortal souls to doom."

Women Opticians In England

Women opticians are appearing in England, and are said to be very successful. Because it is one of the professions which a woman can keep after marriage many other vocations are expected. The only woman practicing in Plymouth is a fully qualified optician and a Master of Arts from Cambridge University. Women prefer to consult a woman optician and many men like the idea of having one gaze into their eyes.

Much Approval Is Expressed Of Dominion-Wide Campaign To Stimulate Interest In Fish Products

End Of Age Of Metal

Use Of Plastic Materials Is Now Increasing

"I believe," said H. V. Potter, chairman of the plastics group of the Society of Chemical Industry, in a lecture, "we are approaching the end of the age of metals; their place will be taken in industry by plastic materials. Already we have reached the stage when the strength of plastic products, weight for weight, is comparable to that of steel and iron."

"Cement in itself was of little use to builders as a main structural medium until it was reinforced. By reinforcing plastic materials with fibrous matter we look forward to the day when we shall be able to produce materials not only as strong as but considerably lighter than the metals, and now use in industry and for domestic purposes."

"There is no reason why we should not one day be able to mould entire bodies for motor-cars of fire-proof material in one piece. Yachts also would lend themselves to such a process. By the use of plastics we are years to come it may be possible to produce a perfect steam-tight hull of a racing yacht, with a finish such as would never be achieved in wood or metal."

"I look forward to the day when we shall see of almost all the constructed of fireproof plastic materials, so that disasters such as we have seen recently of an air liner catching fire and being lost, can never be repeated. For domestic purposes plastic materials are already in daily use, and there are enormous possibilities, however of expansion," Manchester Guardian.

Giant Clover Plant

Collector In Seattle Anatomizes Botanists With New Find

Smithsonian botanists recently discovered themselves astounded, when their hands held some giant clover leaves sent by J. W. Thompson, a Seattle plant collector. He had found them growing on Washington sage brush slopes. He had never seen their like, nor had the Smithsonian men.

Each plant was nearly two feet high and bore flowers almost two inches in diameter. Most of the 300 species of clover have triple leaves, like the shamrock. There are "lucky" four-leaf trefoils, and rare five- and seven-leaf varieties. The Thompson specimens have seven leaves normally, which grow on long, eight-inch stems.

The astonishing aspect of the giant Thompson clover is that it should have been discovered so lately in the U.S., a thoroughly botanized nation. It may be, opined Smithsonian botanist Conrad Vernon Morton, "one of the last conspicuous new plants to be discovered in the U.S."

Become Good Friends

Farmer Gets Well Acquainted With His Horses

The average farmer treats his horses with kindness, due no doubt to the fact that man and horses are usually inseparable companions all day long. Through spring planting and summer and harvest time, man and horse are inseparable. They are something in common, in work like this, and it is small wonder that they really get to know each other. When "Old Dobbin" gets too old to work, he generally spends his last days in the pasture, where he can roam at will.

Quiet and Unpretentious

The Border Cities Star says "The church wedding of Barbara Hutton and Prince Alexis Mdivani following the customary ceremony was announced in advance, 'a simple, quiet, and unpretentious.' A choir of 30 Russian singers furnished the music. Dr. Grabau said the skulls and several jaws of teeth were found in rock caves which contained fossils of animals of the million-year-old period.

Winter Fair Lost Money

The Royal Agricultural Winter Fair Association of Canada operated at a loss of \$11,925 during the year ending January 31, 1932, according to City Auditor Sholto C. Scott. The auditor remarked that the association was in a "very poor financial position."

Air Trips are Being Made to Face Loch Lomond in Scotland

Joining in a letter to the Dominion Department of Fisheries, a number of fishers in Victoria, B.C., recently expressed approval of the campaign of fish cookery demonstrations and lectures which the department is conducting. Naturally, they spoke especially of the program given to their own city a short time ago, but they commended the campaign as a whole. Similar opinions have been expressed by other fisheries people elsewhere.

The purpose of the campaign, of course, is to increase popular interest in Canadian fish foods and their use and thus to benefit the fishermen and fishing industry by widening domestic demand for these products. The demonstrations and lectures are given by Mrs. Evelyn Spencer, the department's specialist in fish cookery, and in recent weeks she has covered has included a number of Prairie Province centres—Edmonton, Calgary, Regina and Medicine Hat, Alberta, and Regina and Saskatoon in Saskatchewan. As a matter of fact, the field has been very much wider than that. In the past few weeks, she has included numerous radio talks which were heard over a wide area, and in recent weeks she has been contacted by reports received by the stations.

At the request of the provincial fisheries authorities of Manitoba, a second program is now being given in that province. The first Manitoba program, which was broadcast, was found so useful that the provincial authorities asked for additional demonstrations and meetings. After the Manitoba schedule is completed, Mrs. Spencer may speak before some Women's Institutes in Ontario and later in the year, it is expected, she will go to the Maritime Provinces.

Fish from all parts of the Dominion and fish in different prepared forms, as well as the fresh fish product, is used in the different demonstrations. In the prairie states, for instance, wild rice is prepared from prairie waters, British Columbia fish, including some Pacific oysters, and Atlantic salmon are prepared, all cooked and served to the audience.

Similarly, in the addresses before public meetings and over the radio, Canadian fish foods generally are discussed, not simply fish and shellfish from one part of the country.

A Valuable Shorthorn

Price-Winning Animal Shipped From Ontario To New Zealand

An aristocrat of the Shorthorn world, Brown Dale Bugler, Canada's "National" exhibition champion and winner of many other prize ribbons, left Canada, O.C., for a thoroughly botanized nation. It may be, opined Smithsonian botanist Conrad Vernon Morton, "one of the last conspicuous new plants to be discovered in the U.S."

His sire, Cragdon Bugler, was one of the animals imported by the Prince of Wales for the E.P. ranch in Alberta, but was purchased by Mr. Douglas on arrival from Scotland and in 1920 for Willow Bank Stock Farm here.

The junior grand champion was purchased by the Dominion Livestock Branch for a New Zealand breeder, who asked for one of the best young male Shorthorns in Canada.

Prehistoric Discovery

Said To Constitute The Most Important Missing Link Find To Date

A group of noted geologists from the Orient, headed by Dr. A. W. C. Silliman, arrived in Peking on their route to the International Geological Congress at Washington, D.C. Dr. Grabau announced the discovery of two new prehistoric skulls of the ancient "Peking man" which said represented the most important missing link theory in prehistoric geology.

Dr. Grabau said the skulls and several jaws of teeth were found in rock caves which contained fossils of animals of the million-year-old period.

The Royal Agricultural Winter Fair Association of Canada operated at a loss of \$11,925 during the year ending January 31, 1932, according to City Auditor Sholto C. Scott. The auditor remarked that the association was in a "very poor financial position."

Here and There

Gasoline sold in Canada during
1932, according to figures com-
piled by the Dominion Bureau of
Statistics, amounted to 508,412,000
gallons. Nearly half the total
was consumed in the Province of
Ontario.The recent Canadian census re-
veals that of the population of
Canada fifty-two per cent. are of
British origin; twenty-eight per
cent. French origin; seventeen
point five per cent. all other Eu-
ropean races, and about four-
fifths of one per cent. Asiatic.The Saskatchewan Department
of Natural Resources will liber-
ate about 2,000 nine-week-old
pheasants throughout the pro-
vince of Saskatchewan during the
coming summer. The birds are
being held in captivity at Moose
Jaw prior to liberation.Despite a somewhat later season
this year, crop conditions
throughout the Prairie Provinces
present cause for optimism in the
opinion of J. M. McKay, general
agricultural agent, Canadian Pa-
cific Railway. He based his view
on improved moisture conditions
and extensive crop acreage, which
at some points was the best
since 1925.Completing a sensational suc-
cessful visit to Canada and the
United States, lasting several
months, the Oxford Group sailed
recently aboard the Empress of
Australia for England under the
leadership of Rev. H. Allen Vin-
cent, their Canadian visit terminated
with a house party at the Château
Frontenac at which 500 members
were present.The death at Vancouver recent-
ly of F. W. Peters, former general
superintendent, British Columbia
district, Canadian Pacific Rail-
way, severed one of the last re-
maining links on the continent
with the pioneering railroad days
of the early settlement. His ser-
vice extended to nearly 52 years.
He was born at Saint John, March
25, 1860.Grant Hall, senior vice-presi-
dent, Canadian Pacific Railway,
back from three-week inspec-
tion trip that took him to the
Pacific Coast, stated that he had
seen and heard much of an en-
couraging character during his
trip and nothing of a contrary na-
ture. He added that there was
distinct revival of hope and res-
toration of confidence.Farm management through the
application of business principles,
practical and theoretical knowl-
edge and ordinary horse sense to
farm problems is a necessity of
this day of lowered prices. T. C.
F. Herzer, manager Canada Col-
onization Association, told the
Winning Kivnans at the Royal
Alexandra Hotel, recently. The
Association has extended its ac-
tivities in Saskatchewan, where it
now has 14 zone managers with
1,544 farms of a total of 477,000
acres under supervision.More than 300 scientists from 21
countries attended the fifth meet-
ing of the Pacific Science Con-
gress opened at the Empress
Hotel, Victoria, June 1, and con-
tinuing at the Vancouver Hotel,
Vancouver, until June 14. It was
the first time the Congress has
met on the American side of the
Pacific Ocean. Lord Rutherford
addressed the Congress from his
home in England, his speech be-
ing carried by radio close on
6,000 miles to Vancouver.
